**SAMPLE ECE FEEDBACK**

**Combined M-OCI and M-OSCE component score**
You passed the M-OSCE, did not pass the M-OCI, and were unable to compensate the low M-OCI score with your M-OSCE score.
- The total aggregate score required to pass this examination was 50.6 out of 100.
- Your total score was 41.8 out of 100.
- This comprised 11.0 out of 50 which was your M-OCI score and 30.8 out of 50 which was your total M-OSCE score divided by 4 (the number of M-OSCE stations).

**Modified Observed Clinical Interview**
- You scored 11.0/50. 28/50 was required to pass.
- Candidates who scored between 23.0 and 27 could still pass this examination if they could compensate this mark with a better than pass score in the M-OSCE.

Below are the marks awarded to you in each criteria.

**Individual Criteria:**
- Data gathering process: achieved
- Data gathering content: did not achieve
- Data synthesis: did not achieve
- Action Plan: just below
- Global Rating: just below

Feedback from your examiners on your performance in the M-OCI is enclosed (see ‘Interview’ and ‘Data Synthesis and Action Plan’ sections in this document).

**Modified Objective Structured Clinical Examination (M-OSCE)**
- Your total M-OSCE score was 123.0 out of 200.
- The score required to pass this M-OSCE was 90.3.
- The SEM for this M-OSCE was 15.6. Candidates who scored between 74.7 and 90.2 could still pass this examination if they could compensate this mark with a better than pass score in the M-OCI.

**Modified Objective Structured Clinical Examination (M-OSCE) – station scores**
Below is tabulated your station score and the cut score. Each station was marked out of 50.

<table>
<thead>
<tr>
<th>station</th>
<th>your score</th>

</table>

Please find below feedback on your examination performance as observed by your examiners during your Modified Observed Clinical Interview (M-OCI).

**Interview**
The way you asked questions was very good.
The examiners indicated that you could improve your examination performance during the interview by asking questions that are relevant to the patient’s main problems.
The examiners recommend that you ask about important areas of history especially the history of:
- the presenting complaint
- the past psychiatric history
- the past medical history
- the risk to self
The examiners indicated that your mental state examination could be improved especially in assessing:
- speech
- mood
- cognition
- judgement

Data Synthesis and Action Plan
To improve your performance in this examination in the data synthesis and action plan components, the examiners indicated that you should describe a formulation that explains why the patient presented with the problems they had and why they presented at that time.
The examiners indicated that you need to improve your knowledge of:
- Phenomenology
- Axis II diagnoses

The examiners suggest that you need to manage your time better and make it clear in your action plan what you are going to do and what you are going to ask other people to do.

---

**SAMPLE REMEDIATION PLAN**

Highlighted sections are sections that should be changed for specific individual requirements.

My examination feedback from the ‘June 2008’ ECE showed deficiencies in the following areas in the M-OCI and M-OSCE:
- Interview content
- Mental state examination
- Data synthesis focusing on Phenomenology and Axis II diagnoses
- Prioritized action plan
- Utilisation of CANMEDS in tackling M-OSCE scenarios

My supervising Fellow, Dr ‘x’ and I have identified the following activities to correct the above mentioned deficiencies:
- These are the areas we have identified following the ECE feedback report that I need to address in my remediation plan: anxiety management, time issues, interview skills, empathy, action plans.
- I will be meeting weekly with my supervising Fellow, Dr ‘x’ to assess and discuss the implementation of this remediation plan.
- I will address difficulties with the M-OCI by:
- I will address difficulties with M-OSCE by:
- I will participate in local exam preparation sessions 1:1 or group which are being coordinated by Dr ‘x’ (Fellow) locally. I will be focusing on the following areas: interview techniques, mental state examination, formulation, data synthesis and action plan.
- I will monitor progress with my supervisor (Dr ‘x’) by:
- I will also monitor my progress by self-reflection
- I intend to utilize other methods of supervision, such as telepsychiatry, etc.
- I will undertake regular (fortnightly) peer review supervision by Supervising Fellow(s) Dr ‘x’ and Dr ‘x’.
- I will attend the next RANZCP ECE Preparation Workshop being held in ‘city’ on ‘dates’
- I will participate in other exam ECE preparation courses provided by ‘source’
- I will undertake to read relevant text books and watch videos to assist with: interviewing techniques, etc.
- I will address anxiety management problems by:
- I intend to achieve these goals and complete this plan by ‘date’.
