

ST3-AP-FELL-EPA22 – Review service delivery in an Early Intervention Service

Area of practice	Adult psychiatry	EPA identification	ST3-AP-FELL-EPA-22	
Stage of training	Stage 3 – Advanced	Version	v0.2 (EC approved 27/07/18)	
The following EPA will be entrusted when your supervisor is confident that you can be trusted to perform the activity described at the required standard without more than distant (reactive) supervision. Your supervisor feels confident that you know when to ask for additional help and that you can be trusted to appropriately seek assistance in a timely manner.				
Title	Review service delivery in an Early Intervention Service			
Description Maximum 150 words	The role of a psychiatrist goes beyond clinical work and involves service improvement and development. The trainee must demonstrate an ability to understand and evaluate the Early Intervention service including: an understanding of the evidence and service models for Early Intervention services, an ability to undertake structured review and quality improvement and to incorporate feedback from young people with mental illness, their families and carers and other stakeholders. The trainee must understand the philosophy and objectives of the service, the service model and the context in which the service operates eg. how it functions within the health service and with other local service providers. The trainee should be able to critically review the referral and discharge criteria, the system of triage and assessment, barriers to implementation, the implementation of evidence based practice within the service and the use of outcome measures.			
Fellowship competencies	ME	7,8	HA	1, 2
	COM	1	SCH	1, 2, 3
