The following EPA will be entrusted when your supervisor is confident that you can be trusted to perform the activity described at the required standard without more than distant (reactive) supervision. Your supervisor feels confident that you know when to ask for additional help and that you can be trusted to appropriately seek assistance in a timely manner.

### Knowledge, skills and attitude required

The following lists are neither exhaustive nor prescriptive.

**Ability to apply an adequate knowledge base**
- Understand the purposes of assessment.
- Understand and consider the various forms/types of assessment (eg. MCQ, MEQ, peer evaluation, OSCE etc.).
- Understand concepts of reliability, validity and practicality with respect to assessment.
- Understand the various means of determining pass marks.
- Understand the concept of blueprinting with respect to assessment.

**Skills**
- Consider the curriculum and blueprint against it.
- Decide on the appropriate form of assessment.
- Develop an appropriate assessment in light of the above.
- Develop a marking *pro forma*. 
• Seek input from colleagues expert in content and/or examination principles.
• If necessary, train examiners and/or markers.
• Determine the pass mark.
• Prepare a report of the examination results, including issues of reliability.
• Prepare feedback for students and examiners.

**Attitude**

• Open to critique as the assessment is being developed.
• Open to change/modify the assessment in light of the evaluation.
• Willingness to justify and, if necessary defend, the assessment.

**Assessment method**

Progressively assessed during individual and clinical supervision, including three appropriate WBAs.

**Suggested assessment method details**

• Professional presentation.
