<b>ST3-PSY-FELL-EPA3 – Management in psychotherapy (COE form)</b>			
<b>Area of practice</b>	Psychotherapies	<b>EPA identification</b>	ST3-PSY-FELL-EPA3
<b>Stage of training</b>	Stage 3 – Advanced	<b>Version</b>	v0.5 (EC-approved 10/04/15)
<b>Title</b>	<b>Foundational management in psychotherapy.</b>		
<b>Description</b>	<p>The trainee should be able to identify and demonstrate the management of significant process issues or problems in a prescribed number of psychotherapy patients. Examples would include:</p> <ul style="list-style-type: none"> <li>• monitoring the progress of the patient in psychotherapy, assessing progress in terms of original formulation, contract and treatment goals and the processes related to the specific modality of psychotherapy adopted</li> <li>• revising the formulation, contract or treatment frame where necessary in response to developments in the psychotherapeutic treatment. Issues here could be of such significance as to likely lead to failure to progress or a significantly less positive outcome, eg. poorly engaging patient, significant deterioration of symptoms or challenging behaviours including threatened suicide during therapy; they could arise from characteristic patterns of behaviour of the patient, from a breakdown of the patient–therapist interaction or may be of iatrogenic origin. Interventions should demonstrate a reasoned approach towards resolution of the problems</li> <li>• managing termination issues appropriately in terms of treatment planning.</li> </ul> <p>Process issues and problems may require guidance from the supervisor but should be demonstrably identified and corrected by the trainee’s active use of therapeutic manoeuvres not simply by passively adopting the supervisor’s instructions.</p>
